

Jasper Exhibition Counter

Scan our QR code to view the full assembly video

You'll receive x2 side panels, front panel, counter top and fixings.

Step 1

Take the front panel and curve the side tabs in so it's self supporting.

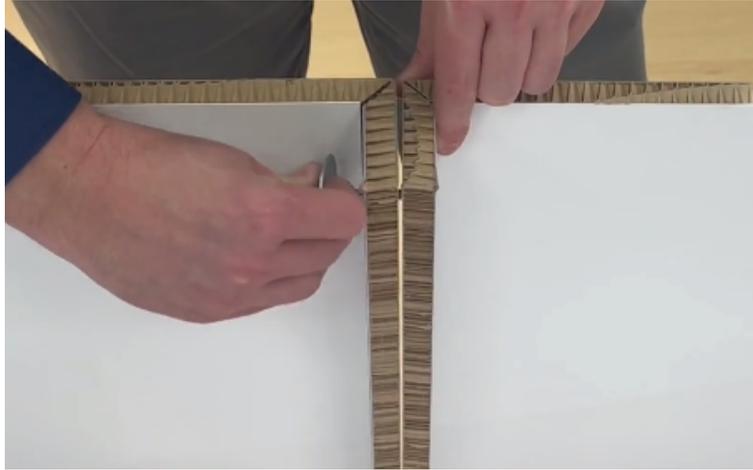

Step 2

Take the 2 side panels and stand them upright, loosely lining the internal tabs together.

Step 3

Connect the side and front panel together using the tabs which are now facing away from your print.

Step 3

Continue this process to connect the 2 side panels to the central panel and connect the 2 halves of the back section together.

Once each side has been attached, you'll have a complete base.

Step 4

Attach the counter top to the base. The top will slot into the counter base.
